

From a Mi-Ki owner:

RECLINER DANGER... This happened a LONG time ago and Kelli is fine...I always warn my clients about recliners...Kelli got stuck in the recliner mechanism while I was slowly, carefully...knowing that there might one of my babies under there...closing my chair. Her right eye literally popped out of the socket. Emergency surgery to replace her eye in the socket again. Thankfully Kelli did not have any permanent eye or vision issues. My chair remained open until it was replaced.
